Ideas with Passion

The **Saeco** Freshness Promise

We have placed a renewed focus on the fundamental elements of excellent coffee – creating ideas that will elevate your enjoyment to a new dimension.

The first dimension: fresh beans for every cup. For each cup whole coffee beans are freshly ground to achieve a truly authentic coffee taste.

The second dimension: crystal clear water for the brewing process. Only in perfectly pure water the beans' aroma can fully unfold – that's why every Saeco is equipped with a water filter by world market leader Brita.

The third dimension: special treatment for our milk. With the Milk Island, Touch2Cappuccino and Pannarello milk froth dreams come true.

To us it is the Saeco Freshness Promise. To you it is a new dimension of enjoyment.

A vision of **enjoyment**.

Welcome to a delight ahead of its time: The Odea Line is characterised by a new touch of purity. Inviting ergonomics and accentuated colours offer visionary design for the epicure who prefers a sovereign style. Equipped with features of equal brilliance the fully automatic coffee machines in the Odea Line make your vision of pure coffee enjoyment come to life – every day.

Always just right – the **Saeco** Adapting System.

With this new feature our machines can automatically adjust to every kind of coffee bean to guarantee the ideal amount of ground coffee is used every time. Because only the exactly right dose allows the coffee's aroma to completely unfold. After preparing just a few cups, the Saeco Adapting System has already adjusted to your coffee beans – and you enjoy an even more intense coffee experience.

Odea Giro Plus

Odea Giro Grey

Odea Giro Orange

Odea Go

Where functionality meets **design**.

Odea Giro Plus

The line's top model features all the technical highlights of the Odea Giro such as the Giro interface, Rapid Steam, Opti-Dose, adjustable drip tray and the cup surface. Additionally the Odea Giro Plus is equipped with an enhanced pannarello made of stainless steel. This eye-catcher ideally matches the uniquely classy Titanium/Silver housing enhancing the atmosphere in every kitchen.

Odea Giro Grey

Also operated via the Giro interface and equipped with pannarello the elegant and classy Grey/Silver Odea Giro is another paradigm in usability. Within seconds steam for frothing up your milk is available – thanks to Rapid Steam. The cup surface and the height-adjustable drip tray furthermore increase this model's convenience. And with Opti-Dose you can individually set the amount of ground coffee you want to use for the brewing process.

Odea Giro Orange

The Odea Giro Orange features the same highlights as the Odea Giro Grey. The only difference: its futuristic and stylish appearance in Orange/Silver.

Odea Go

This model is the purist entry level of the Odea line. With the aid of the Giro interface delicious coffee is conveniently prepared – and milk froth specialties like latte macchiato are also quickly available thanks to the pannarello. And you can manually adjust the drip tray's height to any cup or glass which can be stored comfortably on the cup surface.

Ergonomic Design

Tomorrow's **features** for your everyday enjoyment.

From pure espresso enjoyment to the delight of milk froth specialties like latte macchiato and cappuccino the machines in the Odea Line bring you fresh enjoyment every day – thanks to their complete package of progressive features.

User-friendly interface Rotary chrome knob and indicator lamps give the Giro Interface supreme usability with a stylish appearance. With this interface everything works just beautifully.

Ergonomic design Accentuated colours and inviting ergonomics offer visionary design that will please all coffee epicures who prefer a sovereign style.

Whole beans For each and every cup whole beans are ground. This guarantees you fresh coffee enjoyment with every sip.

Pannarello If you prefer the manual foaming of your milk the pannarello is the ideal way to make your milk froth dreams come true.

Drip tray For your convenience you can change the height of the drip tray. With this functionality you always have the cup right below the coffee outlet.

Energy Safe When your Saeco is idle for a while Energy Safe is automatically activated. The machine is set on stand-by to run even more economically.
